Duration	4 mins 6 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Correct

Mark 1.00 out of 1.00

In which type of search is the list divided into smaller sublists during the search process?

a. Linear search
b. Hash search
c. Binary search ✓
d. Sequential search

Question **2**

Correct

Mark 1.00 out of 1.00

What is the key characteristic of binary search?

a. It can be applied only if the list is sorted ✓
b. It works on unsorted lists
c. It always starts from the beginning of the list
d. It compares elements sequentially

Question **3**

Correct

Mark 1.00 out of 1.00

What is the time complexity of linear search in the worst case?

a. O(log n)
b. O(n log n)
c. O(1)
d. O👎 ✓

Question **4**

Correct

Mark 1.00 out of 1.00

Which of the following scenarios is best suited for applying binary search?

- a. When the list is very small
- b. When the list contains duplicate elements
- c. When the list is unsorted
- d. When the list is sorted ✓

Question **5**

Incorrect

Mark 0.00 out of 1.00

What is the first step in binary search?

- a. Sort the list ✗
- b. Compare the target element with the middle element in the list
- c. Divide the list into two equal parts
- d. Compare the target element with the first element in the list

Question **6**

Correct

Mark 1.00 out of 1.00

In which situation is linear search more efficient than binary search?

- a. When the list is large and sorted
- b. When the list is small and unsorted ✓
- c. When the list is large and unsorted
- d. When the list is small and sorted

Question **7**

Correct

Mark 1.00 out of 1.00

What is the best-case time complexity of linear search?

- a. O👎
- b. O(n log n)
- c. O(log n)
- d. O(1) ✓

Question **8**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

- a. Determining whether an element is present in a list ✓
- b. Sorting elements in a list
- c. Inserting elements into a list
- d. Deleting elements from a list

Question **9**

Correct

Mark 1.00 out of 1.00

In binary search, what happens if the middle element does not match the target element?

- a. The search stops
- b. The search continues from the beginning
- c. The list is sorted
- d. The search continues in the left or right sublist ✓

Question **10**

Correct

Mark 1.00 out of 1.00

Which of the following is not the required condition for a binary search algorithm?

- a. There should be direct access to the middle element in any sublist
- b. The list must be sorted
- c. There must be a mechanism to delete and/or insert elements in the list ✓
- d. Number values should only be present

Number values should only be present

Question **11**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

- a. In the left sublist ✓
- b. In the entire list
- c. At the beginning of the list
- d. In the right sublist

Question **12**

Correct

Mark 1.00 out of 1.00

Which of the following is a type of searching method?

- a. Linear search ✓
- b. Quick search
- c. Merge search
- d. Bubble search

Question **13**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

- a. In the middle of the list
- b. At the beginning of the list
- c. In the right sublist ✓
- d. In the left sublist

Question **14**

Correct

Mark 1.00 out of 1.00

What happens when the element is found in linear search?

- a. The search backtracks to find duplicate elements
- b. The search stops immediately ✓
- c. The search continues until the end of the list
- d. The search starts over from the beginning

Question **15**

Correct

Mark 1.00 out of 1.00

Finding the location of a given item in a collection of items is called

- a. Mining
- b. Searching ✓
- c. Discovering
- d. Finding
